a K-12 tour

MOORECO®

©2026 MooreCo, Inc. All rights reserved.

MooreCo, Inc. reserves the right to correct pricing or copy errors.

Due to the current volatility in the price of raw and finished materials, please refer to our web site for the latest price list for pricing. Since individual items are subject to availability of materials from our suppliers, we reserve the right to limit quantities.

All shipping weights are nominal and may vary depending on items and quantities ordered. When ordering please contact MooreCo customer service at 1-800-749-2258 for accurate shipping rates and lead times.

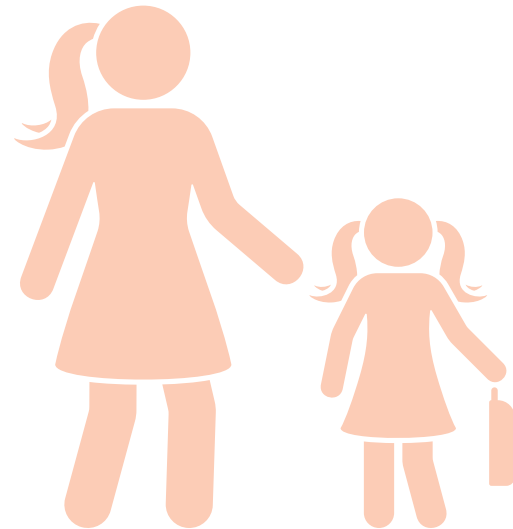

Board dimensions reflect panel sizes prior to framing. All boards listed as 3'H x 4'W actually measure 33-3/4"H x 48"W due to shipping restrictions. Dimensions on all glass dry erase boards are estimated and may vary slightly.

Fabrics and finishes shown in images are chosen for illustration purposes only, and do not necessarily represent accurate scale, color, or best purpose of use. Please consult with our professional design team before selecting fabrics and finishes for your space.

Return Policy: A return authorization is required for the return of any merchandise. All requests for returns should be made within 90 (ninety) days of receipt of merchandise. The dealer may be responsible for restock and return freight charges. Returned products must be unused, undamaged, and in the original packaging. Please contact customer service for more details. Returned merchandise may be subject to a restocking fee.

Restocking Fee: Returned merchandise will be subject to a restocking fee.

Non-Returnable Merchandise: All boards and furniture which have been custom sized, custom framed, or customized to specifications will be considered a non-returnable item.

what makes an active environment?

Our Thrive Philosophy in Practice

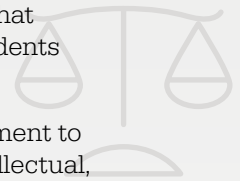

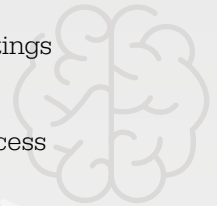

Active learning environments represent a fundamental shift in educational philosophy. Research consistently shows that students in active learning settings outperform their peers in traditional classrooms. Active learning emphasizes learning-by-doing through hands-on experiences, collaborative projects, and peer-mentor interaction, providing students with the skills necessary for success in the 21st century work force.

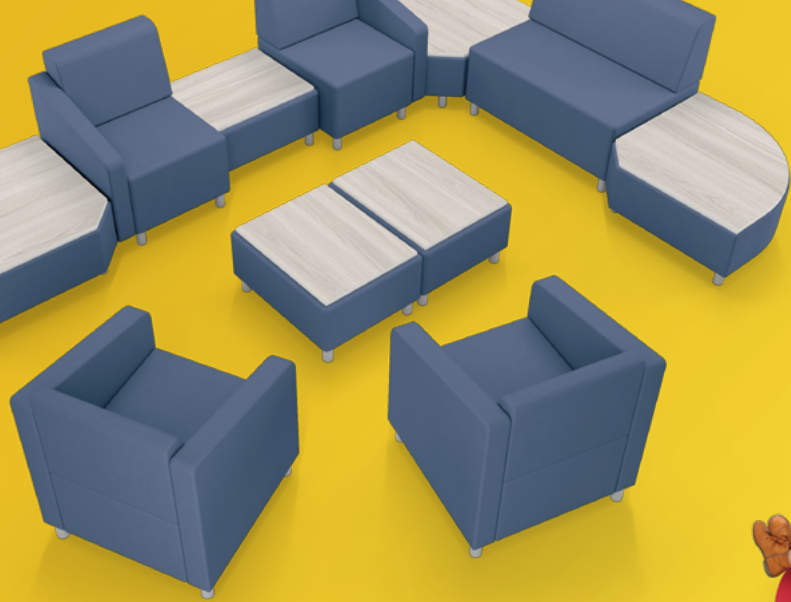

MooreCo has redefined active environments by creating spaces that not only encourage active learning, but also manifest our Thrive Philosophy to provide students with the skills that enable them to perform their best. From flexible seating arrangements that encourage teamwork to adaptable workstations that accommodate diverse learning styles, our solutions create spaces where students are not passive recipients but active participants in their education.

Our commitment to active learning extends beyond furniture. It is a commitment to shaping the future by meeting the six developmental needs of students (intellectual, physical, social-emotional, psychological, spiritual, and moral) and empowering them with the skills they need to thrive academically and personally.

Our Stops on the K-12 Tour:

● 01: Entrances + Hallways	4-11
● 02: Common Areas + Flex Spaces	12-19
● 03: Outdoor Learning Spaces	20-27
● 04: Early Childhood Classrooms	28-35

● 06: Middle School Classrooms	44-51
● 07: High School Classrooms	52-61
● 08: Libraries + Media Centers	62-69
● 09: Maker Spaces	70-77
● 10: Arts + Electives	78-85
● 11: Career & Technical Education	86-93
● 12: DEI + Quiet Spaces	94-101
● 13: Esports Lounges	102-109
● 14: Teachers' Lounges	110-115
● 15: Administration Areas	116-121

Intellectual

Hallways are natural gathering points where the right furnishings support collaboration, planning, and problem-solving throughout the day.

Social-Emotional

Purposeful hallway spaces give students opportunities to connect, collaborate, and build essential communication skills.

Psychological

Hallways that support different learning styles help reduce stress and create environments where students can focus and thrive.

Spiritual

From the moment students enter, hallways should help them feel welcomed, included, and confident in where they belong.

Physical

Comfortable, ergonomic seating in hallways helps students stay focused, supports movement, and prepares their minds for learning.

● STOP 01:

Entrances + Hallways

School entrances and hallways serve as gateways to the educational environment, presenting an opportunity to create spaces that support active minds and bodies from the moment students step into the building. With thoughtfully chosen furnishings, these spaces become more than transitional areas—they become dynamic hubs for inspiration, collaboration, and engagement.

With flexibility and accessibility in mind, these areas have the potential to act as multifunctional spaces where students can gather for impromptu discussions, group projects, and socializing. Open layouts, mobile tables and chairs, adaptable soft seating, space dividers, and multi-purpose zones allow for diverse activities accommodating different learning styles and needs. Invigorating natural light and harmonious colors create an inviting atmosphere that encourages curiosity and engagement among students.

These spaces can serve as hubs for information sharing and knowledge dissemination. Incorporating learning tools such as whiteboards and technology can stimulate creativity and promote intellectual curiosity, fostering a culture of learning outside the classroom. Privacy pods provide intimate study zones or solo work areas.

A welcoming gateway with lounge seating areas, gathering spaces, and designated meeting points provide opportunities for socializing, networking, and building relationships. By creating environments that are flexible, stimulating, and supportive, entrances and hallways play a vital role in enhancing the overall educational experience of students and fostering a sense of belonging within the school environment.

Moral

Hallways should reflect a school's values, with welcoming gathering spaces that reinforce kindness, empathy, and respect.

Entrances + Hallways

Schoolworks Bookcases with handles and casters are mobile resource centers. Stocked with materials that spark passion and curiosity, they encourage students to explore their interests even between classes.

Liso Glass Wall and mobile **Elevate Steps** turn tired entrances into vibrant areas for sharing ideas, brainstorming, doodling, and playing.

B

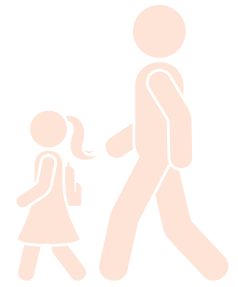

D

Elevate Steps are comfortable, modular units that students can rearrange into countless configurations depending on their mood and needs. Create a fun lounge or use as casual presentation or play zones.

Entrances + Hallways

“

The future belongs to those who believe in the beauty of their dreams.”

—Eleanor Roosevelt

Intellectual

Common areas with access to technology and flexible layouts support exploration, collaboration, and creative thinking beyond the classroom.

Social-Emotional

Spaces designed for collaboration and interaction help students build relationships, confidence, and a sense of belonging.

Psychological

Thoughtful design—including comfortable seating, natural light, and calming colors—reduces stress and supports focus and well-being.

Spiritual

Quiet, flexible spaces give students opportunities for reflection, self-discovery; a deeper sense of purpose and connection.

Physical

A variety of seating, workstations, and flexible furnishings supports movement, comfort, and active bodies throughout the day.

Moral

Inclusive common areas reinforce shared values and help cultivate empathy, respect, and a supportive school community.

● STOP 02:

Common Areas + Flex Spaces

Common areas, such as cafeterias, lounges, study halls, and hallways, hold great potential for promoting active learning, social interaction, and overall student well-being. The high-traffic and central location of these areas give them the unique opportunity to address the diverse developmental needs of the entire student body.

Flex spaces and adaptable common areas can accommodate a variety of activities and learning modalities. Movable furniture, such as wobble stools, rockers, and flip-top tables, allows for easy reconfiguration to suit different group sizes and learning styles. Access to technology and charging stations, supports digital learning and collaboration among students.

Cafeterias have the potential to nourish the entire body. By incorporating a variety of seating options like communal tables and modular soft seating, these areas evolve into hubs for idea exchange. Hallways, corridors, and alcoves, typically considered transitional spaces, convert into extensions of the classroom by implementing reading nooks or learning stations for quick interactions between classes.

Encourage engagement and cooperation among students with open, mobile seating arrangements and designated gathering spaces to facilitate socializing, networking, and building relationships. Quiet study areas or reading corners with soft seating or solo workstations provide opportunities for focused learning and research.

By rethinking the design of common areas and flex spaces, schools not only optimize active-learning spaces but also create an educational ecosystem that aligns with the holistic development of students. The result is an environment where every corner has great potential for promoting a culture that values curiosity, collaboration, and continuous intellectual exploration.

Common Areas + Flex Spaces

By welcoming choice and comfort in common areas with **Inklüd® Tables**, everyone can settle in their own way.

Intellectual

Outdoor learning environments support creativity, adaptability, and problem-solving by giving students and teachers flexible spaces that evolve with them.

Social-Emotional

Furniture should encourage connection and collaboration while creating calming, inclusive spaces that support positive social interactions.

Psychological

Comfortable outdoor seating reduces stress and anxiety while helping students feel relaxed, grounded, and mentally refreshed.

Spiritual

Time in nature inspires reflection, curiosity, and a deeper sense of connection to the world beyond the classroom.

Physical

Access to outdoor spaces encourages movement, supports healthy development, and helps students regulate energy, focus, and overall well-being.

Moral

Outdoor learning promotes empathy, responsibility, and respect by encouraging awareness of others, the environment, and shared community spaces.

● STOP 03:

Outdoor Learning Spaces

Evolving learning environments with outdoor spaces provide a dynamic contrast to traditional classroom settings, offering experiential learning opportunities that engage the senses, promote physical activity, and improve the health and wellness of young learners. Spaces furnished with transitional indoor/outdoor solutions accommodate a greater range of learning styles than traditional teaching methods.

Forward-thinking, outdoor learning spaces equipped with mobile, adaptable furnishings such as weather-proof soft seating and beanbag chairs are quickly becoming the preferred way to harness the benefits of being physically and mentally present in nature. In nature, our senses ignite, our heart rates slow, and our constantly active and buzzing minds calm. Simply being present in nature for as little as ten minutes a day has been shown to positively impact cognitive function, boost energy, reduce stress and anxiety, increase attention spans and short-term memory retention, and improve creative problem-solving and critical thinking skills.

Both students and teachers report feeling happier and healthier, enjoying lessons more, and having better interactions with peers. The positive effect of shifting between indoor and outdoor learning environments is particularly impactful for schools in economically disadvantaged areas where students can experience a full range of benefits by connecting with nature.

Adolescence is a critical period characterized by exploration, identity formation, and the development of autonomy. The ability to effortlessly move between thoughtfully designed indoor and outdoor spaces with flexible, mobile furnishings supports teenagers by fostering a sense of independence and responsibility. Connecting with nature when curiosity and creativity are at their peak cultivates a life-long love of learning and an insatiable sense of wonder.

Outdoor Learning Spaces

Create a sense of order and structure with the modular **Phoeby Outdoor Loveseat** and foster critical thinking and problem solving skills in an outdoor learning space.

Ergonomically curved, the **Phoeby Outdoor Outside Curve Loveseat** promotes relaxation, concentration, and productivity, allowing learners to connect with self and nature.

Outdoor Learning Spaces

Featured fabrics: Silvertex Acid, Silvertex Imperial, Silvertex Limoncello, Silvertex Marine Blue

Where minds wander, creativity blooms. Use the modular **Phoeby Outdoor Outside Curve Chair** to craft outdoor spaces that support psychological well-being and self-discovery.

“

We are all children of one great mother, Nature.”

—Charles Dickens

Phoeby Outdoor Outside Curve Chair with arms

Intellectual

Early learning spaces benefit from flexible seating and adaptable furniture that support focus, curiosity, and active engagement.

Social-Emotional

Well-equipped spaces foster cooperation, communication, and confidence through shared activities and positive peer interactions.

Psychological

Supportive environments with defined activity areas help children feel safe, regulated, and ready to learn.

Spiritual

Thoughtful design choices create moments of comfort, reflection, and belonging that nurture a child's sense of self.

Physical

Research shows, age-appropriate furniture encourages movement, supports coordination, and helps young learners manage energy and attention throughout the day.

Moral

Inclusive furniture that accommodates students of all sizes and abilities creates a secure place for exploration and inquiry.

● STOP 04:

Early Childhood Classrooms

A properly outfitted early childhood classroom not only stimulates natural curiosity and creativity but also supports development and nurtures growth through active-learning experiences.

Layout and furnishings in fun shapes facilitate movement and exploration. Flexible seating arrangements with chairs and foam pads let children explore tools that help them learn and allow for easy transitions between group activities and individual play. Centers for different learning areas, such as reading corners, art stations, and sensory play zones, provide opportunities for diverse experiences that cater to the intellectual, social-emotional, and physical development of preschoolers.

Incorporating age-appropriate furniture and materials is crucial for their physical development. Child-sized tables and chairs encourage independence and facilitate hands-on learning. Accessible shelves with open storage allow children to easily reach and return toys and learning materials, promoting responsibility and organization. The strategic use of bright and cheery colors creates a visually appealing atmosphere that enhances mood and engagement.

Creating spaces that support sensory exploration is vital for preschoolers. Soft, textured materials, access to age-appropriate supplies, and hands-on activities engage children's senses, fostering development of gross and fine motor skills.

A thoughtfully designed, adaptable early-childhood classroom should evolve with the rapidly changing developmental needs of students. By combining intentional design elements with a fun, child-centric aesthetic, educators can create an environment where active learning flourishes, laying the foundation for a lifelong love of learning.

Early Childhood Classrooms

Add comfort, configurability, and fun personality to a breakout space with the **All Foam Soft Seating Cool Cloud Floor Pad**. Let smiles and imaginations grow!

Standing height tables help little ones stay active and focused throughout the busy day.

Early Childhood Classrooms

Intellectual

Flexible, adaptable furniture pieces that support collaboration, different forms of interaction, curiosity, exploration, and inquiry lead to a more agile brain.

Psychological

Providing furniture that feels safe and supportive helps elementary students regulate emotions and develop the confidence to learn on their own.

Social-Emotional

Spaces that encourage connection and collaboration help students build empathy, strengthen relationships, and grow together.

Spiritual

Balanced spaces that support both activity and rest give students room to recharge, reflect, and thrive.

Physical

Studies have shown that the right-sized, movement-friendly furniture supports healthy posture, active engagement, and sustained focus throughout the day.

Moral

Different learning styles begin to emerge in elementary school. Outfit classrooms to accommodate every student so they feel included and valued.

● STOP 05:

Elementary Classrooms

By creating a colorful, cheerful space that supports movement, collaboration, and exploration, elementary educators can optimize active learning and facilitate holistic development of young students. An active-learning environment gives students the freedom to explore their personal learning style, while fostering empathy, respect, collaboration, and cooperation.

Flexible seating arrangements are key in elementary classrooms. Providing a variety of seating options, such as bean bags, standing desks, floor pads, and wobble stools, allows students to choose the setting that best suits their physical needs. Soft seating in fun shapes and colors spark creativity and curiosity. This freedom of choice promotes autonomy and also facilitates concentration and engagement, as students can find a comfortable and conducive environment.

Incorporating cooperative learning stations and flexible work areas with communal tables and modular desks further encourages active participation and exploration. Designated spaces for group projects, hands-on experiments, and independent research empower students to take ownership of their learning and collaborate with their peers. Solo work zones with tablet chairs and rockers keep students engaged and allow them the mental and physical space they need to concentrate and retain concepts.

Integrate technology-rich environments, such as interactive whiteboards or multimedia stations, to enable students to access a variety of learning resources and engage with digital content in dynamic ways. By prioritizing flexibility, collaboration, and student-centered learning, elementary educators can create an environment that empowers students to actively engage in their education while sharpening interpersonal skills.

Intellectual

During a heightened period of neuroplasticity, flexible environments support collaboration and critical thinking while strengthening problem-solving skills.

Social-Emotional

In middle school classrooms, spaces designed for connection help students strengthen relationships, build empathy, and grow interpersonal confidence.

Psychological

Supportive middle school environments foster independence while giving students the security they need to take healthy academic risks.

Spiritual

Working together is a primary tenet of active learning. When students work together, the knowledge becomes a point of pride.

Physical

Provide movement-friendly furniture and adaptable layouts that support circulation and focus, and foster a receptive frame of mind.

Moral

Encouraging choice and accountability helps students develop responsibility, integrity, and a stronger sense of ownership.

● STOP 06:

Middle School Classrooms

By creating spaces that prioritize flexibility, teamwork, and student autonomy, educators can effectively engage middle school students in active learning while nurturing their developmental needs to help them thrive.

Flexibility is key. Providing mobile furniture, such as adjustable desks and modular seating arrangements, allows for easy adaptation to different learning activities and group sizes. This flexibility encourages students to take ownership of their learning environment, fostering a sense of responsibility and independence. Collaborative learning spaces are essential for promoting social interaction and teamwork among middle school students. Outfitting areas specifically dedicated to group work, such as project tables or breakout zones, encourages collaboration and peer-to-peer learning. By working together on tasks and projects, students develop important interpersonal skills such as communication, problem-solving, and conflict resolution.

Interactive whiteboards, dry erase tables and desks, multimedia stations, and digital learning platforms provide opportunities for interactive instruction and personalized learning experiences. Leveraging technology for collaborative projects and virtual communication helps students develop digital literacy skills and prepares them for the demands of the 21st-century workforce.

Creating a welcoming and inclusive atmosphere is crucial for meeting the social and emotional needs of middle school students. Implementing strategies for promoting mindfulness and emotional regulation, such as designated quiet areas or mindfulness exercises, supports students' social-emotional development and well-being. By prioritizing flexibility, collaboration, and student-centered learning, educators can create an environment that empowers students to actively engage in their education while fostering positive social relationships and emotional growth.

Intellectual

Outfit classrooms with transitional furnishings to create a dynamic, collaborative space that developing high school minds need.

Social-Emotional

Students adept in social-emotional literacy lead with empathy and communicate with confidence. Foster that growth with furniture that encourages collaboration and engagement.

Psychological

Providing areas to decompress and reset supports emotional regulation, reduces stress, and helps students return to learning with clarity and resilience.

Spiritual

Spaces that encourage stillness and self-awareness help students feel grounded in who they are and confident in who they're becoming.

Physical

Physically supported students are comfortable and ready to learn. Outfit classrooms with a focus on ergonomics to foster fully engaged minds.

Moral

Accessible spaces that honor diverse perspectives and learning styles empower students to express themselves and hear one another.

● STOP 07:

High School Classrooms

By creating dynamic spaces that accommodate diverse learning styles and promote collaboration, high school educators can empower students to take ownership of their education while cultivating essential skills for success in higher education and into the workforce.

Providing versatile furniture arrangements—such as flip top tables and tablet chairs—allows for seamless transitions between different modes of instruction, whether it's individual study, group discussions, or project-based learning. This flexibility not only caters to the varied learning preferences of students but also encourages independence and self-directed learning.

By integrating technology supported products such as media centers and charging stations into the learning environment, educators can empower students to become digital citizens and lifelong learners in an increasingly digital world. Enable students to access information, collaborate with peers, and engage with content in ways they will encounter in higher education and the workforce by equipping classrooms with teamworking tools like interactive whiteboards.

Create spaces that promote collaboration and foster a sense of community by including mobile, configurable tables and chairs for group work, discussion circles, and peer mentoring. Encourage informal gathering and promote a sense of belonging with breakout zones and soft seating.

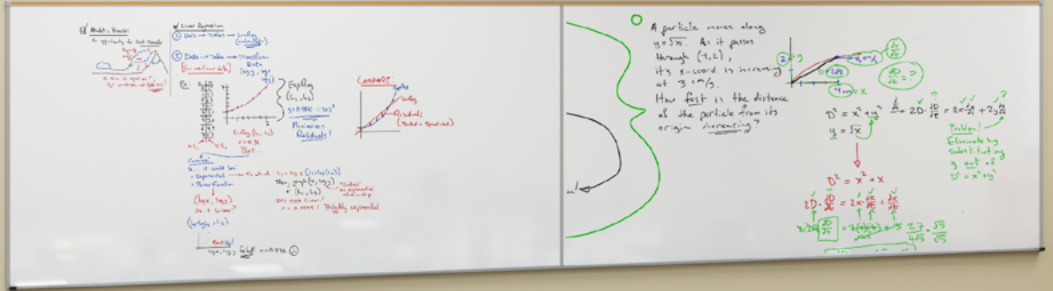

Classroom design should prioritize the well-being and comfort of students. By prioritizing flexibility, technology integration, collaboration, and student well-being, educators can create dynamic learning environments that empower students to thrive academically, socially, and personally.

Physical

Move beyond static seating with varied heights, mobile elements, and flexible arrangements that encourage good posture and support diverse physical needs.

Moral

Shape media centers as inclusive community spaces where shared resources encourage responsibility, respect, and meaningful engagement, ensuring students know their value.

● STOP 08:

Libraries + Media Centers

The traditional library has evolved into a multi-purpose media center, offering access to computers and technology as well as books. Furnished with a variety of seating and tables to provide space for group and individual work, the physical library supports and enriches its digital counterpart. These spaces are integral within active learning environments, serving as hubs for knowledge acquisition, collaboration, and community engagement. Providing versatile, easy to arrange tables and chairs, functional whiteboard space dividers, and modular shelving allows for adaptation to different activities, learning styles, and group sizes.

Designate areas for quiet study with tablet chairs, communal tables for collaborative work, and modular soft seating for socializing or creative expression. Flexible seating options, cozy reading nooks, and ergonomic furniture enhance comfort and promote focus and concentration.

Equip media centers with digital resources, interactive displays, and multimedia stations to provide students with access to a wealth of information and encourage exploration and discovery. Accessible technology facilitates collaboration and communication, encouraging students to work together on research projects, presentations, and creative endeavors.

Libraries and media centers play a vital role in fostering social connections and community engagement. Encourage peer-to-peer learning and teamwork with multifunctional spaces that can transform into group study rooms, discussion areas, maker spaces, or event spaces for workshops and book clubs. A well-equipped multipurpose media center creates opportunities for students to connect and fosters a sense of belonging.

Libraries + Media Centers

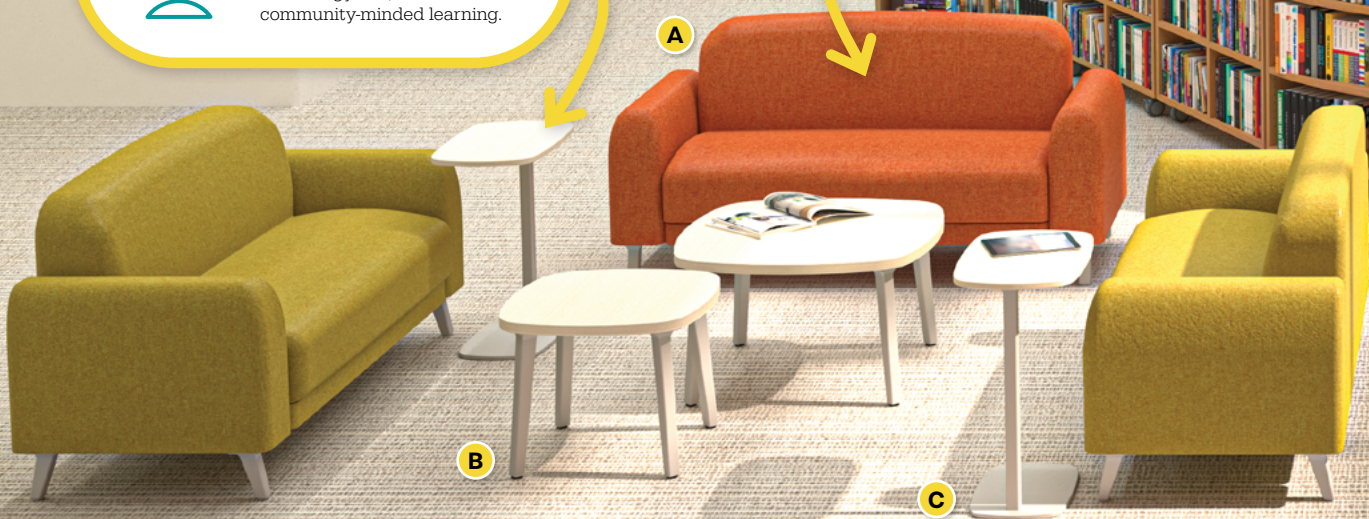

Need a custom piece? Work with MooreCo designers and engineers to create the perfect furniture solution for your space!

Students who are easily stimulated benefit from adaptable arrangements that provide individual spaces as needed without feeling left out. **Luly™** straight and curved sections can be configured in pods or individual seating.

Integrate flexible tablet tables into media centers to support shared access, responsible technology use, and community-minded learning.

Intellectual

Modular, flexible furnishings encourage exploration and promote creativity and innovation—strengthening problem-solving and critical thinking skills.

Spiritual

Students build self-esteem and resilience by completing projects. Ensure students have what they need to succeed with a fully equipped space.

Psychological

Providing varied seating empowers students to choose how they work best, which builds confidence, independence, and a stronger sense of self.

Social-Emotional

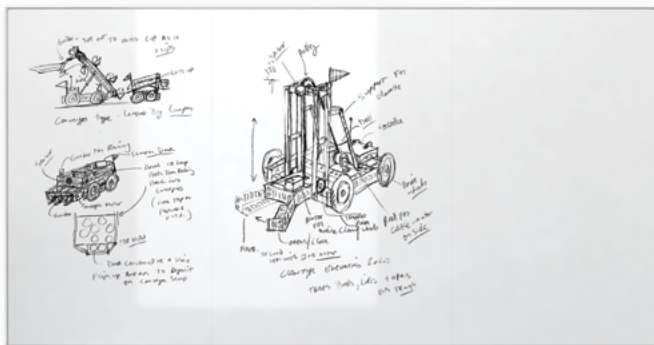

Maker spaces spark lively collaboration, and with adaptable furnishings, students can easily build strong teams while sharpening communication and interpersonal skills.

Physical

Exercising the connection between mind and body teaches students to trust their intuition, and problem-solve in nontraditional ways.

Moral

Collaborative furnishings in maker spaces nurture empathy and respect, giving students room to listen, connect, and grow together.

● STOP 09:

Maker Spaces

Maker spaces are innovative environments designed to promote hands-on learning and foster creativity among students. They are equipped with a variety of tools and materials that encourage exploration and experimentation. They provide access to specialized skills and resources to engage in a diverse range of projects and activities.

Include sturdy, durable communal project tables to give students ample space for collaboration, cooperation, and peer-to-peer learning. Students hone communication skills, empathy, and team building skills by sharing ideas and learning from one another's experiences.

A tenet of active learning, hands-on projects promote invaluable skills like problem-solving and critical thinking. A thoughtfully designed and well-organized maker space frees up space for creativity. Diverse storage options keep specialized tools secure, accessible, and organized. Casters and handles enable workstations to move where projects need them.

Flexible furnishings and visual communication tools provide opportunities for students to interact with their peers in meaningful ways. Collaborating and cooperating on projects, giving and receiving feedback, and working together to overcome challenges promotes teamwork, communication skills, and empathy.

Maker spaces are inclusive and accessible to all students, regardless of their background or abilities. Designing spaces that accommodate diverse learning styles and preferences like adjustable height tables and soft seating ensures that every student has the opportunity to participate and contribute to the maker community.

Maker Spaces

Social-Emotional

Large, collaborative workspaces promote communication and cooperation and strengthen social bonds.

Intellectual

Spark imagination and curiosity while developing the critical thinking skills that power real-world solutions.

Psychological

Electives provide opportunities for self-expression and creativity, allowing students to explore their emotions, interests, and identities through different mediums.

Spiritual

Electives offer a supportive space where students can take risks, learn from failure, and grow through guided mentorship.

Physical

Comfortably accommodate students of all sizes and ages, enabling flexible spaces that adapt throughout the day.

Moral

Exposure to diverse artistic voices fosters empathy in cozy areas designed for meaningful learning between students.

● STOP 10:

Arts + Electives

The arts and electives are essential experiences that promote active learning. Engaging in creative projects requires students to build resilience, think critically, communicate effectively, and persevere through challenges, helping them build confidence and self-esteem.

It is key to prioritize adaptability, creativity, and collaboration in spaces designed to further meet students' developmental needs and help them thrive. Multifunctional space with versatile furniture like stacking chairs and mobile tables allows for a variety of activities and projects. Incorporating durable, secure storage space for art supplies, musical instruments, or other materials ensures that students have easy access to resources. Storage on casters mean supplies go where they are needed and pegboard panels on project tables keep tools within arm's reach.

Facilitate collaboration and peer-to-peer learning by incorporating comfortable soft seating areas for group discussions, critique sessions, or performances. These spaces encourage students to learn from one another's experiences, work together, and share ideas. Natural light, vibrant colors, and expansive whiteboard space create an inviting atmosphere that encourages students to explore their artistic talents and express themselves freely.

These spaces should be inclusive and accessible to all students, regardless of their background or abilities. Designing rooms that accommodate diverse learning styles with a variety of seating and adjustable tables and desks ensures that every student has the opportunity to participate. By providing opportunities for creativity, collaboration, and skill development, these spaces empower students to explore their interests, express themselves, and grow as individuals.

Arts + Electives

The **Mobile Teacher Workstation II** is perfect for a busy electives classroom. Smooth casters ensure instructors can move from one activity to the next quickly and easily.

Intellectual

Exposure to career pathways and life skills builds knowledge, supported by sturdy furnishings and practical storage.

Spiritual

Invite students to explore their passions and sense of purpose with furnishings that support how they learn best.

Psychological

Providing a quiet, enclosed workstation creates a focused retreat for skill-building, reflection, and one-on-one instruction.

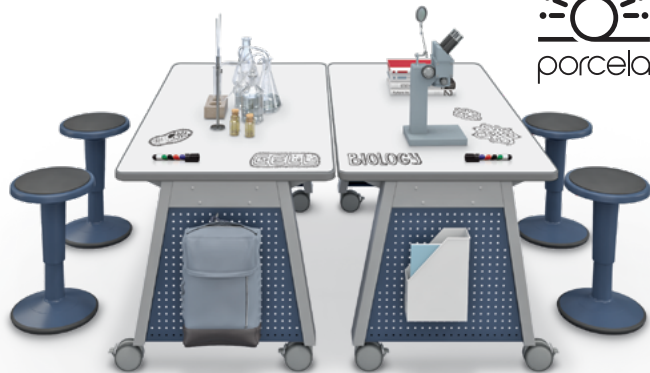

Social-Emotional

Flexible, mobile furnishings let students move seamlessly from independent work to team-based collaboration and social connection.

Physical

Workspaces outfitted with adjustable, ergonomic tables and chairs give students the physical support they need to master a new skill.

Moral

Reconfigurable tables and seating create space for collaboration grounded in responsibility, work ethic, and integrity.

● STOP 11:

Career & Technical Education

CTE programs play a crucial role in active learning by providing hands-on experiences, fostering collaboration, and connecting students with industry professionals. They allow students to explore their passions, prepare for success in their chosen careers, and empower them to achieve their full potential.

Set students up for success by using the environments they will encounter when they enter the work force. CTE courses are dynamic and engaging and often require state-of-the-art equipment and industry-standard tools. Sturdy, durable workstations and ample storage solutions create an energetic and motivating atmosphere guaranteed to withstand the heavy use of a CTE classroom.

It is imperative that these spaces facilitate collaboration and teamwork and adapt to the rapidly changing needs of the workforce. With mobile, modular products like tables and chairs with casters and foldable workstations, spaces can quickly reconfigure from solo work to collaborative, hands-on learning. Adaptable products ergonomically adjust to the physical needs of users of all ages and sizes, and keep students mentally, physically, and intellectually ready to learn.

Every student deserves the opportunity to flourish and find community. Spaces should be inclusive and accessible to all students, regardless of their background or abilities. Providing height adjustable workstations and a variety of ergonomic seating accommodates diverse learning styles and ensures that every student has the opportunity to participate and excel in CTE programs.

When developmental needs are met, students will excel no matter what path they choose. Thoughtfully designed CTE spaces pave the way for balanced, confident, healthy, and empowered graduates who will succeed in contributing to the workforce and their community.

Physical

Comfortable furnishings in peaceful quiet rooms help students reduce stress, recharge energy, and reset from stimulating environments.

Moral

Inclusive spaces with varied furnishings foster respect, kindness, integrity, and a shared sense of belonging.

● STOP 12:

DEI + Quiet Spaces

Spaces designated as quiet rooms or DEI programming promote a sense of belonging, celebrate diversity, and provide opportunities for dialogue and learning. Their furnishings must be inclusive and accessible to all students to ensure every student feels valued and respected within the school community.

Welcoming spaces offer a serene and peaceful atmosphere to take a break from the school day and recharge their minds. Quiet reflection spaces with soft seating can serve as safe havens for students who may need a break from social interactions or sensory stimuli. Incorporating elements such as soft lighting and calming colors creates a conducive environment for relaxation and introspection and supports overall well-being and mental health.

Outfit the spaces with tools and resources to engage in self-reflection, mindfulness practices, and connection. Whiteboards aid in sharing thoughts, wobble stools release excess energy, and rocking chairs calm nerves. Create a safe environment for students to reflect on their thoughts, emotions, and experiences to promote self-awareness and emotional regulation, essential skills for personal and social development.

DEI + Quiet Spaces

Intellectual

In thoughtfully designed esports environments, students build strategic thinking and adaptable skills that prepare them for an ever-evolving world.

Social-Emotional

Create collaborative configurations to encourage communication, teamwork, and shared achievement.

Psychological

Defined gaming zones create a sense of belonging and autonomy, boosting confidence while reducing performance pressure.

Spiritual

Dedicated esports spaces with welcoming furnishings foster community, connection, and a shared sense of purpose.

Physical

Comfort and movement stimulate the mind and body, allowing thoughts to flow more quickly and connect with physical reflexes.

Moral

Structured competitive environments reinforce respect, accountability, and fair play. Foster a sense of acceptance and unity with accessible furnishings.

● STOP 13:

Esports Lounges

Esports lounges are dynamic, inclusive spaces for engagement, skill development, and social interaction within a structured and supportive environment. School esports programs provide opportunities for students to develop digital literacy skills, practice stress management and goal setting, and derive a sense of self-esteem and community.

Lounges require ergonomic furniture with height adjustable tables and supportive chairs that power all-day activity and create environments that inspire resilience and build self-confidence. Outfit the lounge with a variety of products that enable movement, rest, and collaboration so students can take mental breaks while gaining friendships and building community.

Spaces should offer opportunities for both individual and team-based gaming experiences. Designating areas for solo play as well as organized tournaments and team competitions encourages collaboration, communication, and sportsmanship among students. Gathering areas with couches, benches, and community tables accommodate workshops, guest speakers, and coaching sessions.

Esports programs have become a unique platform for diversity, equity, and inclusion. Through teamwork, conflict resolution, emotional regulation, empathy, and a sense of community, students acquire important life skills that can positively impact their personal and professional development. Modular soft seating provides a space for individuals to connect, share experiences, and develop meaningful relationships with peers.

Properly outfitted lounges encourage students to move throughout the space to find their optimal setup. Designating areas for casual gaming, socializing, and networking allows students to build friendships, share interests, and develop a sense of belonging within the esports community.

Esports Lounges

Featured fabrics: Canter Ink, Matchmaker Paradise, Silica Blend Diamond, Silica Tech Charge

Visionary® Hierarchy Magnetic Glass Boards allow students to share gaming tips and announcements.

D

A

B

Elate Task Chairs offer a completely customizable gaming station. Ergonomic and mobile, gamers stay comfortable all day or move from station to station for demonstrations or socializing.

Easily mobile and configurable, the **Akt Rectangle Table** lets gamers create pods for interactive play.

C

Add vibrant accents and visual interest with a collection of **Elevate Wind Ottomans**. Modular and mobile, gamers and spectators can move the ottomans to observe, rest, or chat.

“

Just play. Have fun. Enjoy the game.”

—Michael Jordan

Esports Lounges

Intellectual

Furnishings that encourage teamwork and tools for idea sharing create a conducive environment for innovative, interdisciplinary lesson planning.

Moral

Create a welcoming space where teachers have opportunities to find deeper meaning in their work.

Social-Emotional

A lounge with mobile, flexible furnishings allows teachers to create the space they need when they need it.

Spiritual

An inviting space to reflect and recharge creates balance for teachers and helps find a sense of purpose.

Physical

Because teaching is physically demanding, ergonomic and adaptable furnishings help sustain comfort and energy all day long.

● STOP 14:

Teachers' Lounges

Creating an adult-only space for teachers and staff benefits everyone at the school. Teachers who are more relaxed are more able to effectively resolve conflicts in the classroom, collaborate, communicate, and focus on what is most important—connecting with students.

When thoughtfully designed, teachers' lounges are a conducive environment for relaxation, collaboration, and professional growth. Prioritize restfulness and functionality by providing comfortable, flexible seating, ample natural light, and ergonomic workstations. Create a welcoming atmosphere where educators can recharge and rejuvenate during breaks.

Teachers' lounges are hubs for collaboration and knowledge-sharing among educators. Designating areas with communal tables and intimate privacy pods encourage group discussions, peer mentoring, and professional learning opportunities. Building social relationships is just as important as professional ones. Provide opportunities for educators to connect and encourage informal interactions with cozy, welcoming soft seating.

Support the holistic well-being of educators by incorporating wellness resources such as meditation areas or relaxation corners to encourage self-care practices and promote a healthy work-life balance. Solo privacy pods give teachers a much needed stimulus break and gives them a quiet space to recharge or prepare for their next class.

By providing a comfortable and functional environment, fostering collaboration and professional growth, and promoting social connection and well-being, teachers' lounges empower educators to thrive both personally and professionally.

Psychological

Well-designed lounge environments support mental well-being and professional growth by creating space for restoration, connection, and self-care.

Teachers' Lounges

Designed to bring everyone to the table, the **Community Table** fosters shared dialogue and a stronger culture of belonging.

Positioned around a shared table, the **Akt 4-Leg Chairs** support face-to-face connection—strengthening the everyday relationships that sustain educators.

Featured fabrics: Boundless Viridian, Classique Fruity, Marathon Heatwave, Swivel Daydream

Tucked beneath the **Community Table**, **Morris Mobile Stools** offer a flexible seat for quiet regrouping or focused conversation, supporting the metal reset educators need throughout the day.

“

The most valuable resource that teachers have is each other. Without collaboration, our growth is limited to our own perspective.”

—Robert John Meehan

- B. Akt Wire Base Chair
- C. Inklüd® Table

Teachers' Lounges

Intellectual

People are more productive and motivated if they are in their optimal work environment. Provide a variety of options for staff to find their ideal setup.

Social-Emotional

Designed as a welcoming hub, the circulation desk supports meaningful daily interactions that build trust, collaboration, and a stronger sense of community.

Psychological

Comfortable, calming lounge areas provide administrators with a place to decompress, reset, and return to their work with clarity and composure.

Spiritual

A thoughtfully arranged soft seating area offers administrators a quiet place to pause, reflect, and reconnect with the purpose that guides their leadership.

Moral

A welcoming administrative space reinforces ethical leadership and integrity. When leaders are supported, the entire school community benefits.

● STOP 15:

Administration Areas

School administrative offices serve as hubs for organizational management and decision-making. They are critical spaces where values such as integrity, leadership, and resilience have the potential to trickle down to teachers and students.

Administrative offices should prioritize functionality and efficiency. Providing well-organized workstations, storage solutions, and technology enables administrators to manage their responsibilities effectively and efficiently. Height adjustable desks and ergonomic seating helps with physical comfort as well as motivation and productivity.

Communal spaces offer opportunities for collaboration, communication, and professional development among administrators. Designating comfortable areas for team meetings, brainstorming sessions, and collaborative projects with visual communication tools fosters a sense of camaraderie and encourages teamwork. Flexible, mobile tables and chairs allow administrators to transform spaces to meet their needs.

Administrators need mental breaks as much as students and teachers. Provide opportunities for administrators to connect and build relationships with their colleagues. Break areas build community and camaraderie within the administrative team. Soft seating zones not only encourage relaxed conversation, they also boost creativity and innovation by giving the mind and body a break from desk work.

By providing functional workspaces, fostering collaboration and professional growth, and promoting social connection and well-being, these spaces empower administrators to excel in their roles and contribute to the success of the school community.

Physical

Motivation and productivity are driven by physical comfort. Staff need supportive, ergonomic options to keep their bodies and minds working.

Administration Areas

Folio Cabinet Storage creates a custom organization system. From wardrobe cabinets to shelves to cabinets to drawers, administrators can meet their unique storage needs.
